DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. A step for how the sensor can actually determine or measure an odor is critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). While the apparatus in and of itself appears to be novel, the claim is for an odor sensor, yet there is nothing in the claim that would indicate that the sensor has "sensed" an odor. The claim calls for a mixed material in a viscous liquid and electrodes in the liquid, yet there is nothing stating what this device actually does or how it can do it. While the preamble does state that conductivity is varied in response to odor, there is not indication of how the varying conductivity responds to the odor or what that response means.

Allowable Subject Matter

3. Claims 2-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
